

May 2025

Grade 2C

I think Spring is here to stay! It is hard to believe that there are only 2 months left of grade two and I know they will be busy months for sure!

Chick Week

There is lots of egg-citement in the air as we look forward to our chick week at the beginning of May. It is always such a highlight to watch them hatch and then to care for the chicks during the week. Students will report on the daily changes in their Chick Journal. We hope to have a link on our website to show some videos of our chicks hatching.

LA and Math in May

Language Arts: In May, we will continue to work on poetry. Please continue to read with your child every night, even as the weather warms up and spring sports begin. The students know that the only way to become a better reader is to read, read, read.

Math: Students will be finishing off our geometry unit and beginning to work on our data unit this month. Please have your children continue to work on their quick recall of addition and subtraction facts to 18 at home. This will greatly benefit your child.

Thank-you for your continued support and prayer. If you have any questions or concerns, please let me know!

In His service,

Mrs. Pelster
